Specialists in Performance-Driven LED Lighting

XICO® Lighting

Xico Lighting is a Boston-based LED lighting manufacturer. Our mission is to design the best products possible through scientific research, human centric design, and innovation to lead the lighting industry and bring a higher level of performance, control, and efficiency to the lighting market.

We are the type of organization where science and design are permanently intertwined — creating reliable, high-performance lighting solutions that deliver exactly the right light for your design plan.

Designed & Built in

BOSTON

In-House Capabilities

Our 55,000 square foot state-of-the-art production facility houses a variety of equipment — assembly lines, robots, extruders, CNC machining, and 3D printers. Our rapid prototyping and manufacturing capabilities are highly flexible and our product design, engineering and product development staff are on hand to help scope any work as well as assist with any design questions and system-related issues.

Our Products

Our line of LED fixtures deliver low-glare, high-efficacy, and high CRI lighting distributions and practical beam control options that transform spaces, improve visual comfort, and save energy.

High-Performance Linears

PRO Series LED linear fixtures are contractor-friendly — designed for serviceability to easily remove integral drivers, LED engines, and optics in the field. Available in 2", 3", and 4" apertures, beam and square forms, and a range of mounting options — pendant, surface, recessed, perimeter, and wall.

Compact Linears

NANO Series LED linear fixtures come in a small form with best-in-class light quality — designed to use with a remote driver. Available in a 0.95" aperture, beam, square, and slot forms, and a range of mounting options — pendant, surface, recessed, and wall.

Low-Profile Linears

MICRO Series LED linear fixtures are designed to install as a discrete architectural fixture or in continuous runs or shapes. MICROBeam is built with an integral driver, MICRO square, slot, and rail forms work with a remote

driver. MICRO beam and square forms are available in a 1.4" aperture and a range of mounting options — pendant, surface, recessed, wall, and track. MICRO Rails are available in 1.1" and 1.4" apertures and mount in a rail system.

Edge-Lit Linears

EDGE Series LED linear fixtures are ultra-slim using light guide technology — designed to use with a remote driver. Available in 2.75", 4", 4.5", and 5.5" apertures, less than an 1" tall, solo, razor, halo, and slot forms, and a range of mounting options — pendant, surface, recessed, perimeter, and wall.

T-Bar and Ceiling Grid Systems

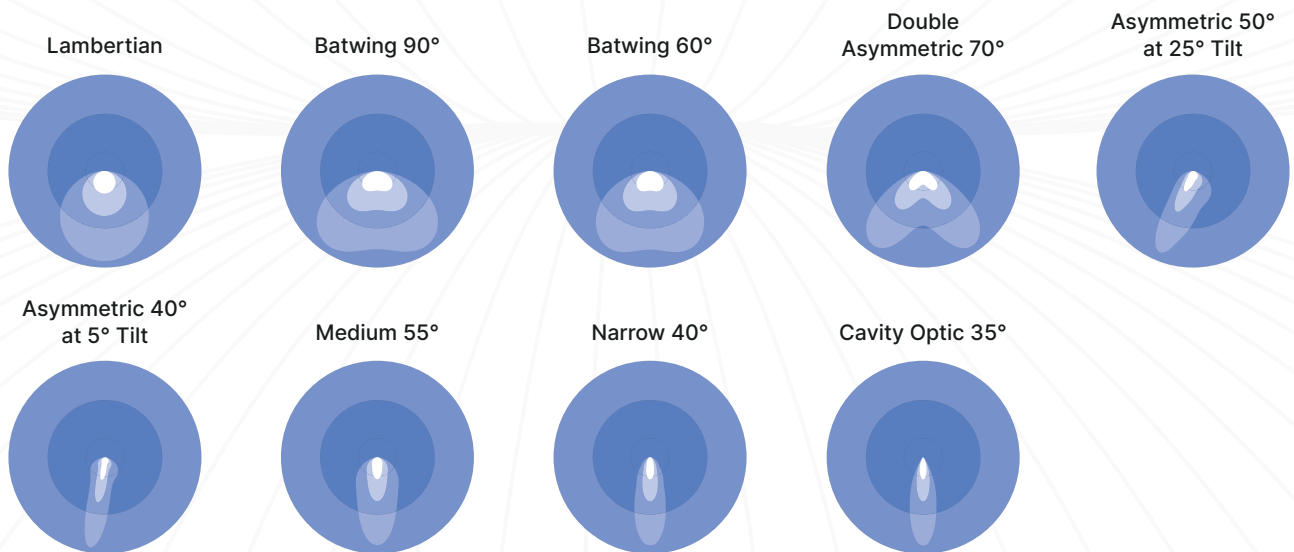

GRID Series LED lighting fixtures expand the visual appeal and functionality of grid bars, lines, panels, and hybrids.

SmartBeam[®]

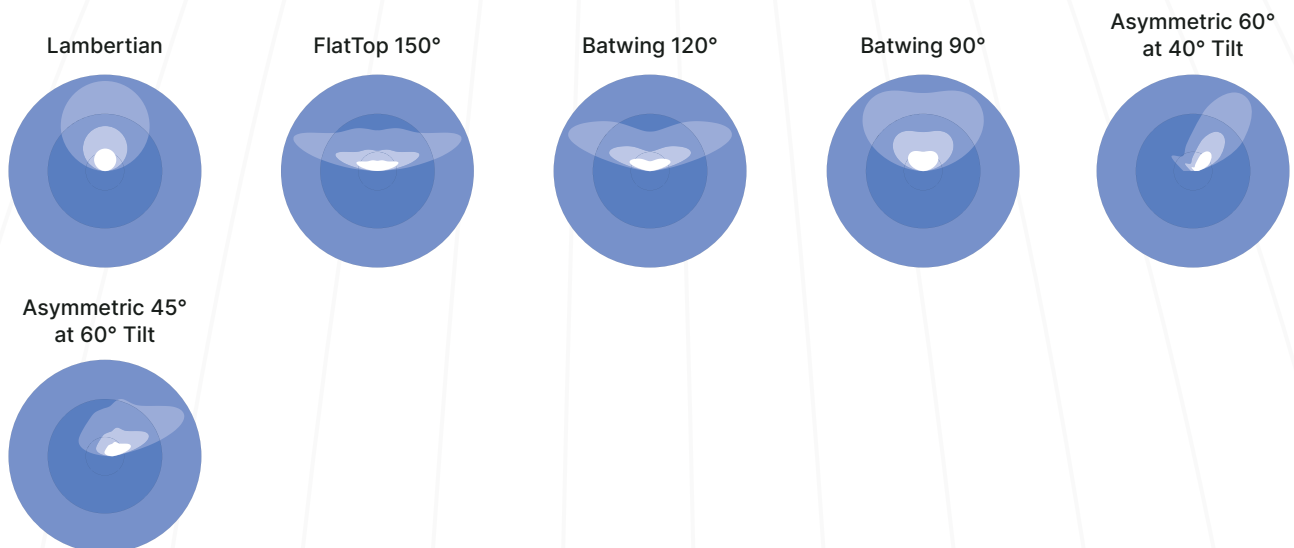

Adaptive Wavefront Technology

SmartBeam makes it easy for lighting specifiers and designers to specify the exact light required for any architectural space. Developed with a single purpose to deliver the ultimate controlled specification-grade lighting distribution and colors at your fingertips — giving you the tools to control light via switches, controllers, and even your mobile phone.

Indirect Beam

Fusion Optix® Inside

XICO is passionate about designing and manufacturing innovative, high-performance architectural and specification-grade light fixtures. Everything we do is powered by the unique Fusion Optix Inside technology platform.

Declare Listed

Declare labels provide a quick and reliable way to make choices about the environmental footprint and safety of the product. Declare is internationally recognized and the labels can be found on the product, product packaging, or company website. Visit xicoled.com for Declare Listed details.

Red List Free

An industry standard certification for LED lighting products based on the International Living Future Institute (ILFI). These products only use materials based on the "Red List of Toxic Chemicals" (a list of chemicals and materials known to be hazardous to people and/or the Earth) that are safe, healthy, and environmentally sustainable.

Lighting Spaces

Delivering the Right Light

XICO LED fixtures create the right light for a variety of spaces — locally and nationally.

Committed to Sustainability

Responsibly Manufactured LED Lighting

XICO is a trusted partner assisting in the process for leading building standards and the highest industry certifications. Every XICO product starts with sustainability in mind — its design, how we'll make it, how it ships, and how you will use it.
